GENERAL INFORMATION

Exclusive Plans For WordPress Websites Only

This document outlines the available website maintenance and management plans that are exclusive to WordPress websites only. We offer separate website maintenance plans for websites built on other CMS platforms.

Why Is Website Maintenance Important?

Website maintenance is essential to ensure your website stays secure, performs optimally, and adapts to the latest technological advancements. Regular updates protect your site from vulnerabilities, prevent functionality issues, enhance user experience, and improve your search engine rankings amongst other things. Without consistent maintenance, websites can experience downtime, security risks, layout and design errors, slow loading times, and more which can negatively impact your brand's reputation and customer trust. By investing in regular maintenance, you're ensuring that your website remains a powerful tool to grow your business.

Why Is It Important to Collect Website Analytics?

Tracking user traffic and data analytics is crucial for understanding how visitors interact with your website. It provides valuable insights into user behavior, such as which pages are most popular, where visitors are coming from, and how long they stay on your site. This data helps you make informed decisions to improve the user experience, optimize content, and adjust marketing strategies. Additionally, analytics can reveal patterns and trends, allowing you to identify opportunities for growth, improve conversion rates, and better target your audience, ultimately driving business success.

Comprehensive Website Maintenance for Optimal Performance and Growth

In addition to maintaining your website's performance and tracking valuable user data, our plans are designed to grow with your business. Whether you're looking for basic upkeep or advanced features like security monitoring and custom updates, we have the right solution for you. By choosing the right maintenance package, you'll not only safeguard your site but also ensure it continues to evolve as your business and audience needs change. Let us handle the technical aspects so you can focus on what matters most—growing your business.

CHOOSE THE RIGHT PLAN FOR YOUR WEBSITE

Additional Plans

KMWA Plan

\$240/Year

Keep My Website Alive (KMWA) Plan, is as basic as it gets. Once a month, your website is reviewed for aesthetic issues, receives all the necessary updates, and is backed up. This will prevent most catastrophic issues that could occur due to neglecting your website.

All Inclusive Package

\$1,200/Month (6-Month Contract)

The All-Inclusive Package is the most comprehensive offering, combining the full benefits of the Professional Plan with 15-hours of website development work each month. This package delivers unmatched value, as our standard rate is \$75/hour rate for development work. It's perfect for businesses that need ongoing updates, new features, or custom development in addition to top-tier website management.

- **Monthly Savings:** Professional Plan (month-to-month) \$600 + 15-Hours of Development (\$1,125) = \$1,725 value. Your cost: \$1,200/month. **(Savings each month = \$525)**
- **6-Month Savings:** \$3,600 for the Professional Plan + \$6,750 in development work = \$10,350 value. Your cost: \$7,200 total. **(6-Month Savings = \$3,150 OR \$6,300/yr)**

This plan saves you \$6,300 in services each year, yielding the highest ROI and savings among all of our website management plans.

ADDITIONAL WEBSITE MODIFICATIONS

Hire For Modifications, Fixes, Consulting, Etc.

\$75/Hour

Billed In 15-Minute Increments

Our standard rate for website development is **\$75/hour**, billed in 15-minute increments. For clients on the **Essentials Package** or higher, any task that takes less than 15 minutes is included at no additional charge.

For clients without a maintenance plan, there is a **minimum service fee of \$19** for tasks under 15 minutes. Larger projects will require a custom project quote, with pricing determined on a per-job basis.

Clients also have the option to set limits on their work requests, such as setting a **maximum budget** or timeline. If the developer reaches this limit, they will pause and contact the client for further instructions.

For clients who need **ongoing work**, we offer the convenience of consolidated billing, allowing charges to be combined into one invoice rather than billed individually. This ensures a smooth and flexible billing process tailored to your needs.

Hourly Rate: \$75/Hour Billed In 15-Minute Increments.

Payment Information:

Upon completing the work, an invoice will be sent to your email that is due within 24-hours. You are able to pay by card for all transactions under \$100. For transactions larger than \$100, a ACH Transfer is required.

Project Based Pricing

Larger work requests require project quotes with pricing determined on a per-job basis. A project is defined as any task or request that significantly alters the structure, functionality, or content of the website, or is expected to take a substantial amount of time. Projects typically involve more planning, design, and execution than smaller hourly tasks.

- Addition of a new page or post
- Addition of a plugin that has not existed on your website before
- Addition of a feature to the website that has not been previously on the site
- Redesign of 30% or more of any given page, post, header, footer, or menu
- Work requests expected to take longer than 6 hours
- Complete website redesign or overhaul
- Development of a custom functionality (e.g., advanced forms, user portals)
- E-commerce integration or modifications
- Migration of the website to a new platform or host
- Creation of a landing page for a marketing campaign
- Any work requiring modification or addition of any code or PHP File
- Any work on the hosting platform, PhpMyAdmin, or cPanel
- Any form of digital investigation or website recovery
